Bekasi, West Java | steelblack222@gmail.com | 081287553878 | LinkedIn | Portfolio

PROFILE

A sixth-semester Information Systems student with experience in data analysis, data visualization, and system design through seven academic projects using Python, Power BI, and MySQL. Equipped with systematic thinking and an analytical mindset to understand data comprehensively and generate meaningful insights, eager to contribute and grow as a Data Analyst.

EDUCATION

Bina Sarana Informatika University | *Bachelor of Information Systems* | **09/2023 – Now**

- Cumulative GPA: 3.93/4.00 | 6th Semester.
- Research and Development Staff at the Information Systems Student Association..

Public Vocational High School 3 Bekasi | *Software Engineering and Computer Networking* | **05/2019 – 07/2022**

SKILLS

Soft Skills

- | | | |
|-----------------------|-------------------|---------------------------|
| • Systematic Thinking | • Result-Oriented | • Adaptability |
| • Problem Solving | • Decision Making | • Effective Communication |

Hard Skills

- **Data Analysis & Visualization** : Python, Jupyter Notebook, Power BI, RapidMiner.
- **System Design & Modeling** : ERD, UML, Figma.
- **Database Management** : MySQL & phpMyAdmin.
- **Productivity & Reporting**: Word, Excel, Canva.

ACADEMIC PROJECTS

Python-Based Simple Pharmacy System | **09/2023 – 12/2023** (*1st Semester Final Project*)

- Developed a simple pharmacy system using Python via terminal input.
- Implemented procedural programming concepts including functions, list data structures, loops, and conditional branching..

Restaurant Database System | **03/2024 – 06/2024** (*2nd Semester Final Project*)

- Designed a restaurant database system using phpMyAdmin.
- Designed five entities with inter-table relationships and implemented JOIN operations for cross-table data retrieval.

Earthquake Data Visualization and Analysis in West Java | **03/2024 – 06/2024** (*2nd Semester Final Project*)

- Analyzed and visualized earthquake data in West Java using Python on 324 rows of data sourced from the West Java BPBD.
- Generated insights on areas with the highest earthquake frequency using Jupyter Notebook in Visual Studio Code.

IT Employee Salary Simulation Data Visualization and Analysis Using Association Rules Algorithm | 09/2024 – 12/2024 (3rd Semester Final Project)

- Analyzed salary data patterns of 400 IT employees using Machine Learning Extension with the Apriori and Association Rules algorithm in Python using Jupyter Notebook in Visual Studio Code.
- Generated insights on the correlation between salary, work experience, and job position.

IT Outsourcing Web Information System | 09/2024 – 06/2025 (3rd – 4th Semester Ongoing Final Project)

- Led a team in developing a web-based IT outsourcing information system.
- Responsible for UI/UX design (Figma) and system modeling (ERD, LRS, Activity Diagram, Sequence Diagram), as well as coordinating technical implementation with the team.

Consumer Shopping Trend Visualization and Analysis | 03/2025 – 07/2025 (4th Semester Final Project)

- Visualized and analyzed consumer shopping trends from 3,091 rows of data using Power BI.
- Analyzed purchase patterns based on product categories and time periods, along with a comparison of shopping behavior across genders through an interactive dashboard..

Global Air Quality AQI Classification Using Data Mining | 09/2025 – 12/2025 (5th Semester Final Project)

- Applied the C4.5 (Decision Tree) algorithm to classify global air quality across 3,361 rows of data based on the AQI index using RapidMiner.
- Provided criteria weighting referenced to WHO standards.

ORGANIZATIONAL EXPERIENCE

Information Systems Student Association | *Research and Development Staff* | 09/2024 – 03/2025

- Contributed to needs analysis and proposal preparation for equipment procurement in organizational activities, including charity events, knowledge-sharing sessions, and an iftar gathering involving orphaned children from Naelul Khaer Foundation.

TRAINING & CERTIFICATION

Talent Scouting Academy | *Database Design & Programming with SQL* | 02/2024 – 07/2024

- A collaboration between Digitalent Kominfo and Oracle. Studied database design and programming using SQL through Oracle Academy, covering database schema design, SQL queries, and implementation using Oracle Database. Cumulative Score: 90/100 | 180 Instructional Hours.

LANGUAGES

- Bahasa Indonesia | Native
- English | Passive (Reading & Comprehension)
